

Alexander Kirzhbaum

Illustrator and graphic designer.

I worked as an art director in design studios and branding agencies.

Observing reality, I create atmospheric illustrations of alternative worlds with an ironic and melancholic mood of the characters

I am interested in illustration for magazines and books, as well as for packaging, corporate identities and presentations, comics and micro-animation.

If you have a task for which you need to find a graphic solution, write to me and we will discuss possible options for its implementation. Do not hesitate to contact me.
